

SENIOR SERVICE ENGINEER

IMS Systems, Inc. seeks a Senior Service Engineer to work at our manufacturing facility in Mars, PA, and be responsible for servicing, commissioning, and maintaining IMS equipment at customer locations in North America as well as training U.S. employees on our highly specialized products, processes, and systems. Duties include: (i) commissioning IMS measurement systems and sub-systems (hardware, software); (ii) performing installation supervision on-site working with OEM, contractors, and end-users for new installation and system upgrades; (iii) training new Engineers and providing technical support in the United States; (iv) providing repair, maintenance, on-call emergency support as required and maintaining communication with department manager while in the field; (v) ensuring standard operation procedures (SOP) so that a safe and proper operation for all systems is guaranteed; (vi) providing customer training on-site for operational and technical end-users; (vii) updating and/or writing procedures for new proprietary equipment; and (ix) providing consulting services to customers on how to apply technology to optimize technical and financial results.

Must have a bachelor's degree (or foreign equivalent degree) in Electronic Engineering or Electrical Engineering plus five (5) years of post-baccalaureate and progressively responsible experience in a related position servicing isotope and x-ray measurement systems.

Experience must include three (3) years working in the steel and aluminum industry.

Must also have any experience with or knowledge of: (i) ionized radiation; (ii) electrical and mechanical troubleshooting; (iii) PLC programming following EIC 61131 standards; and (iv) Windows, Visual Basic, logi.CAD, and SAP as well as networking skills.

Must also have BS Isotope and Radiation Safety Certification

Must be able and willing to travel domestically to various unanticipated employer, client, and other locations up to 80% as well as occasionally overseas.

Experience can be concurrent.
